

Impulse Fitness SL Line Spec

SL line is a high quality commercial series consists of 16 plate loaded equipments currently. Robust, effective and aesthetically appealing, this professional plate loaded line is designed to reproduce the feeling of using free weights. The application of advanced biomechanics ensures that our equipment follows the body's physiological movement to help keep the user free from injury. Minimum maintenance is required for commercial applications. It is our great honor that SL line was selected as the sole training equipment for China National Weight Lift Team in 2008.
